MN GAC field summaries

Observed in statewide sources. Field population describes available values; it is not a compliance grade or a county-direct schema assessment.

Parcel Polygons

71.30%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.1.3

55,291 records | 91/91 field names | 4/7 mandatory fields full

Selected gaps: CTU Code: 0.00%; Export Date: 0.00%; CTU Name: 99.13%

Population scan: 91 of 91 standard fields. All-field population: 24.24%.

Road Centerlines

98.55%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.1.1

4,119 records | 73/73 field names | 28/34 mandatory fields full

Selected gaps: Surface Type: 53.51%; Routing Speed: 98.66%; Right Zip Code: 99.39%

Population scan: 34 of 73 standard fields. Unscanned fields are not scored.

Address Points

100.00%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.3.2

9,004 records | 53/53 field names | 17/18 mandatory fields full

Selected gaps: Latitude: 99.99%

Population scan: 18 of 53 standard fields. Unscanned fields are not scored.

Population = the share of evaluated field values containing data. Full means populated for every record. Road/address observations are separate from access classifications.
