Scott County

MN GAC field summaries

Observed in statewide sources. Field population describes available values; it is not a compliance grade or a county-direct schema assessment.

Parcel Polygons

100.00%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.1.3

61,696 records | 91/91 field names | 7/7 mandatory fields full

No partial mandatory-field results recorded.

Population scan: 91 of 91 standard fields. All-field population: 52.19%.

Road Centerlines

100.00%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.1.1

10,599 records | 73/73 field names | 33/34 mandatory fields full

Selected gaps: Routing Speed: 99.98%

Population scan: 34 of 73 standard fields. Unscanned fields are not scored.

Address Points

100.00%

Mandatory population

Observed 2026-11-26 05:01 CST

MN GAC standard v1.3.2

64,626 records | 53/53 field names | 18/18 mandatory fields full

No partial mandatory-field results recorded.

Population scan: 18 of 53 standard fields. Unscanned fields are not scored.

Population = the share of evaluated field values containing data. Full means populated for every record. Road/address observations are separate from access classifications.
